

WHY SOLAR :

Energy crisis, an inevitable outcome of humongous consumption of nonrenewable energy resources has now stressed upon the ultimate need to look for dependable, lasting & cleaner ways of harnessing natural energy. Given this fact, the human race is forced to turn towards the inexhaustible supply of energy received from the sun, wind, tides etc. Harnessing energy from these sources not only ensures a future much more dependable on renewable fuel consumption but also provides a solution to the ever increasing pollution hazards and their ill effects. In the past few decades, the world has seen a considerable increase in the production & consumption of solar energy. Solar is a clean & green investment and the most abundant energy source. Even though it is profusely available, we must practise to utilize our resources optimally. It provides us a booming opportunity to harness this inexhaustible source of energy & convert it into electrical energy to power modern day technology.

SERVICES :

We endeavour to establish our presence and offer capable services in all possible sectors. AB Energía Solution Pvt. Ltd. (ABESPL) performs the entire process from the initial assessment of geographical area to installation of a completely customised solar energy system to the point the system starts producing renewable and sustainable energy, thus we offer the most economical and innovative solutions. Our Solar PV Panels that we use are well tested which enable us to offer years warranty with conviction

We Offer EPC Solutions For :

- › Ground Mounted Projects
- › Rooftop Projects
- › On-Grid / Off Grid Projects
- › Building Integrated PV Projects
- › Other Applications

TOTAL PROJECT SOLUTIONS :

We offer, end-to-end solutions for the complete installation of Solar PV Power Plants right from the Project Feasibility & Advisory, Government Policies & Guidelines up to and including the Plant Design, Construction, Maintenance and Management of the same.

Project Concept :

- › Detailed Project Report
- › Registrations & Statutory Compliance
- › Advisory & Policy Guidelines
- › Land Advisory

Design & Epc :

- › Design Concepts, Technical & Project Feasibility
- › Detailed Design & Drawings
- › Commissioning

Operations & Maintenance :

- › Routine Operation
- › Preventive & Breakdown Maintenance
- › Uptime Guarantees
- › Performance Guarantees

Plant Management :

- › Statutory & Mis Reports
- › Power Sale & Advisory
- › Rec Trade & Advisory
